

GardenSearch:

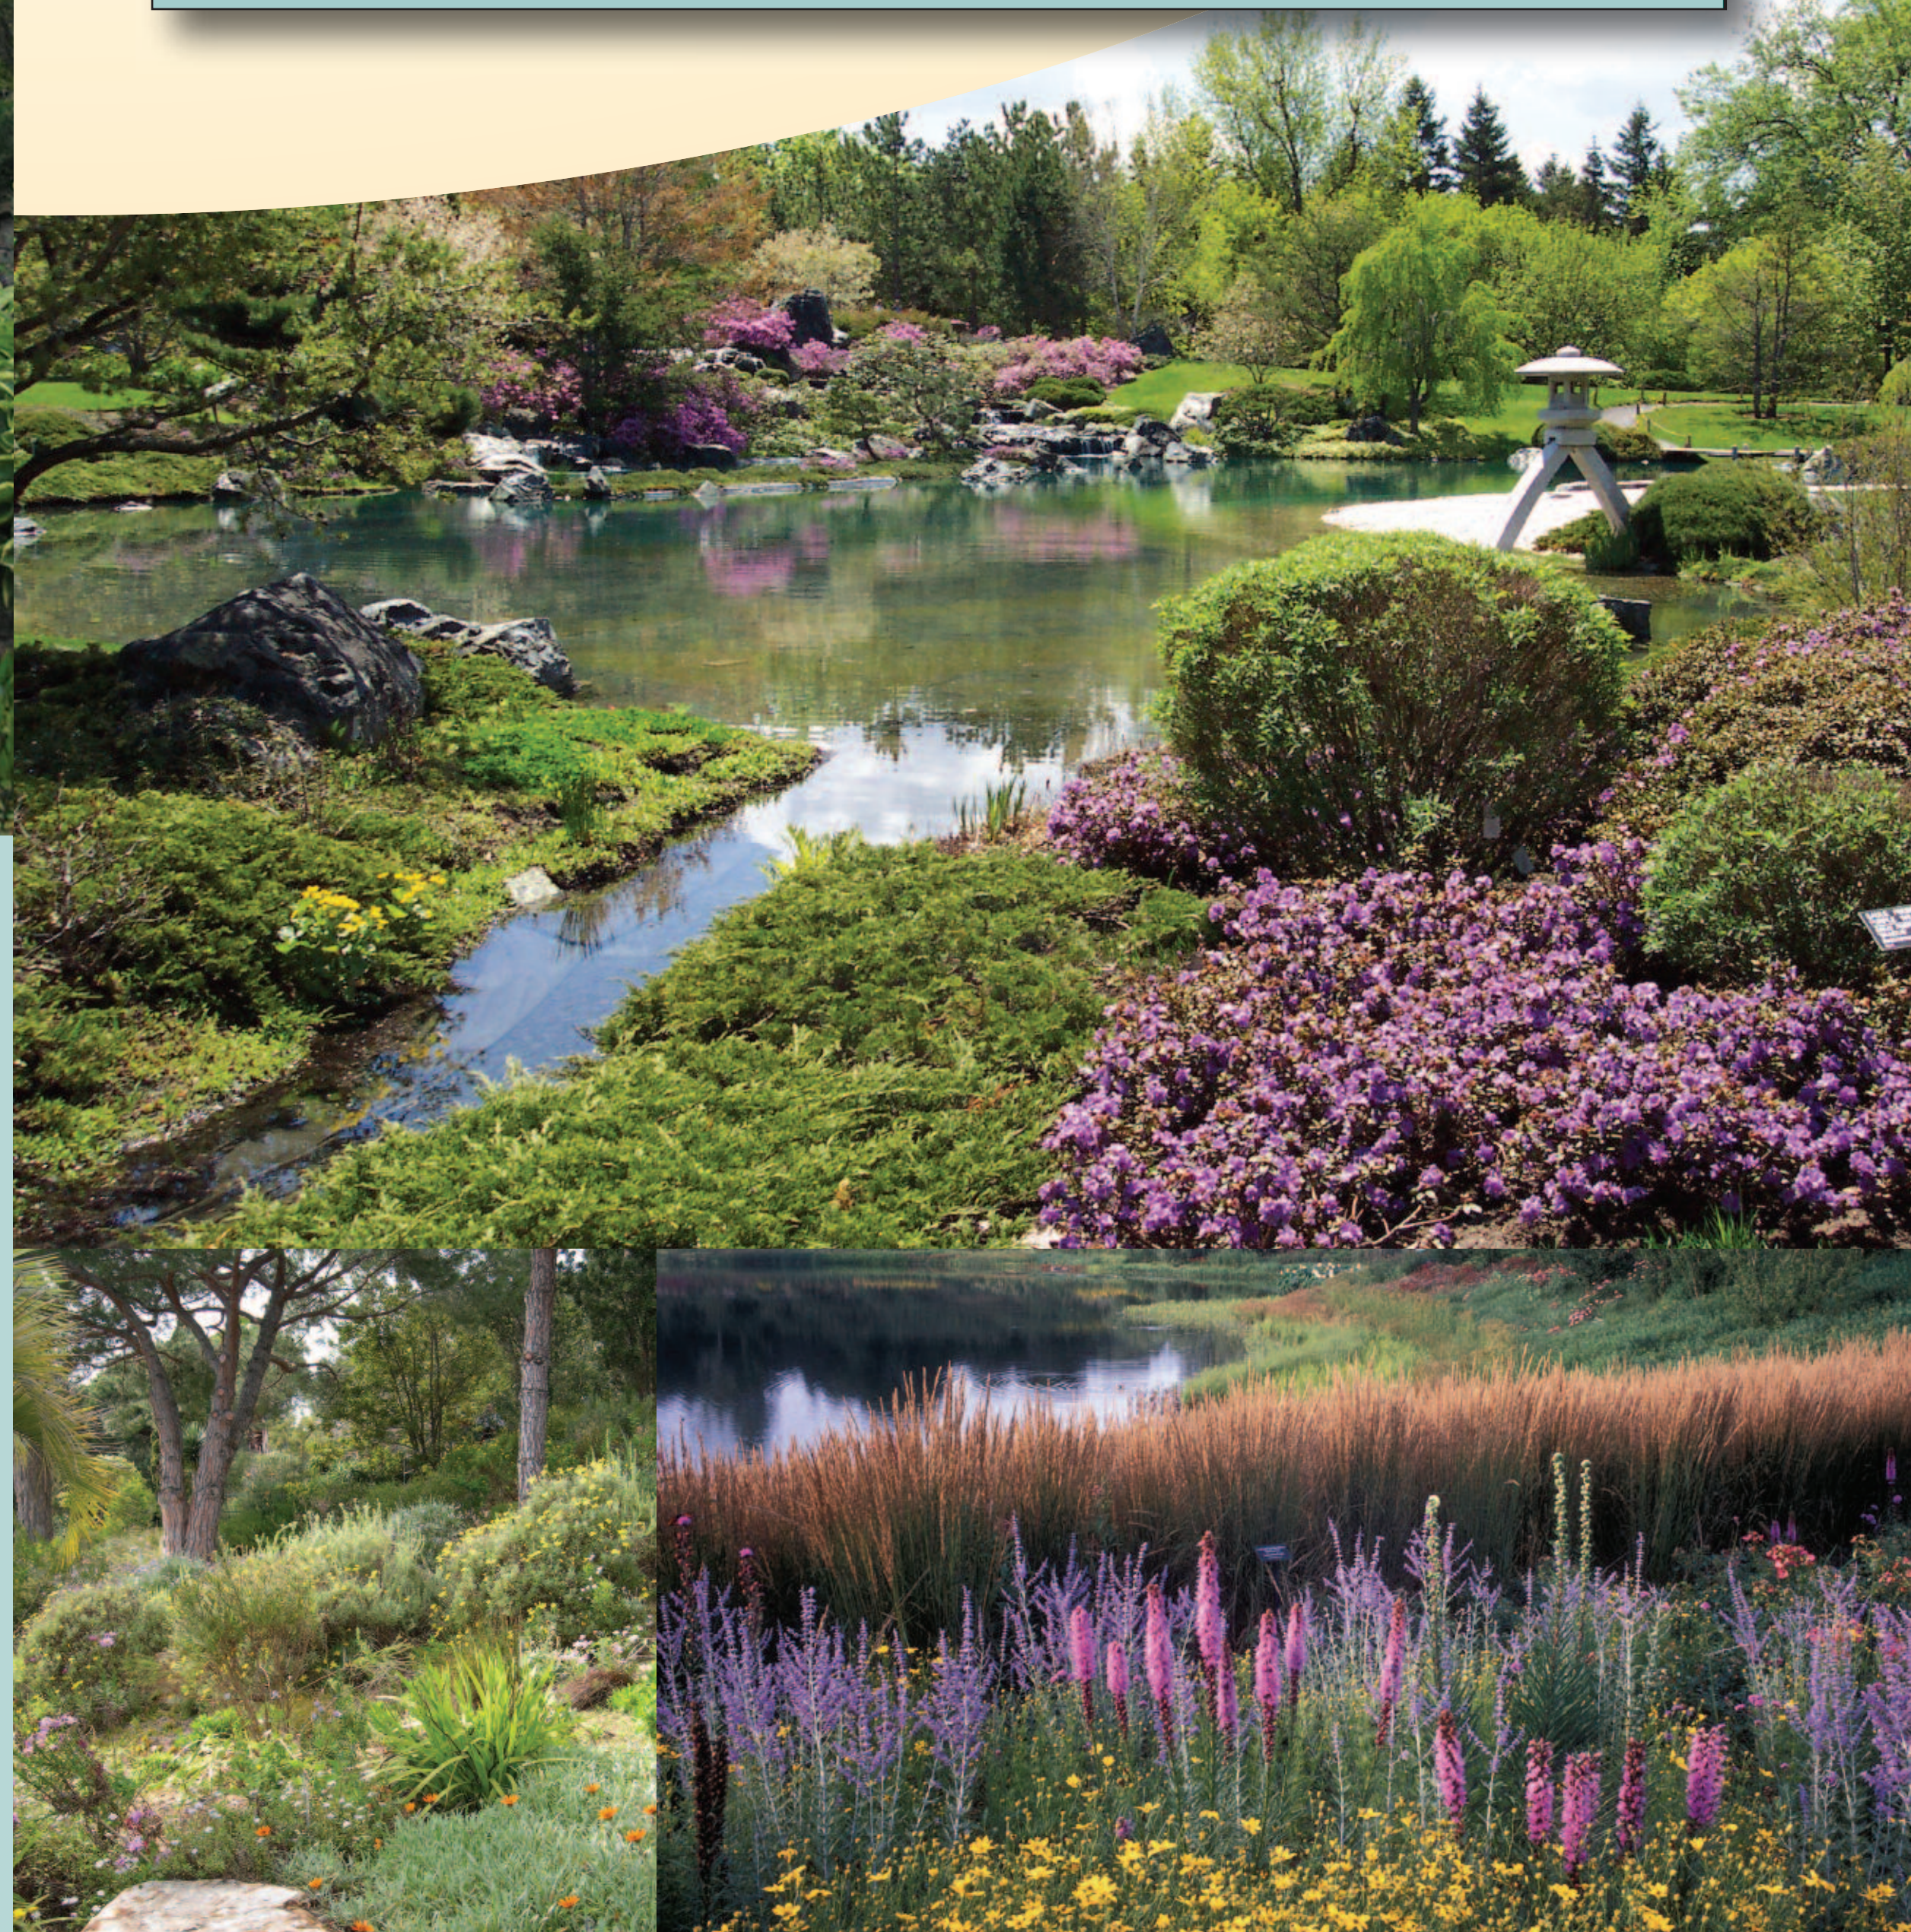

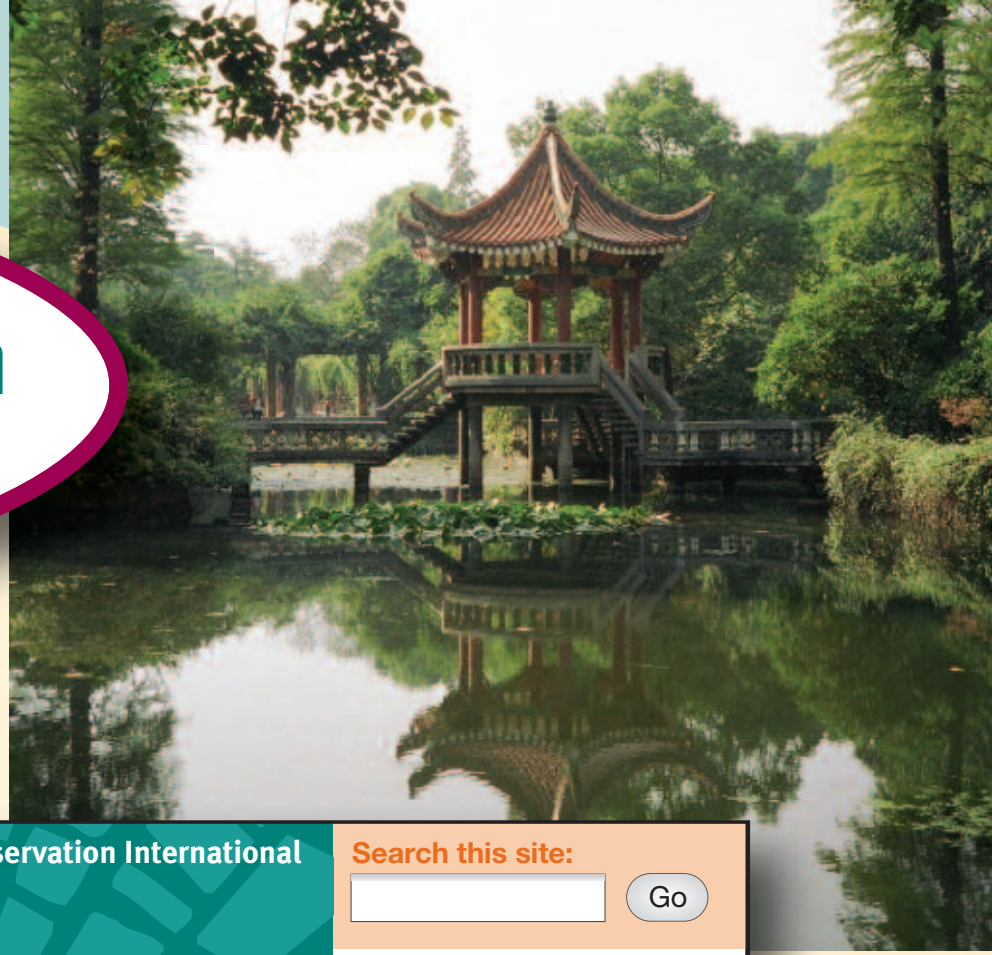

Your gateway to the world's botanic gardens

The screenshot shows the BGCI GardenSearch homepage. At the top left is the BGCI logo with the tagline 'Plants for the Planet'. Below it are navigation tabs: 'What We Do', 'Our Members', 'Botanic Gardens', and 'Get Involved'. A search bar is located at the top right. The main content area features a 'Welcome to BGCI' message, a world map titled 'Botanic Gardens around the world', and a 'Latest News' section with a headline: 'Global Biodiversity Map can Guide Plant Conservation & Predict Species Richness' dated 22nd March 2007. A sidebar on the left contains a 'SIGN UP NOW' button for a free email newsletter.

This screenshot shows the profile page for the Wuhan Botanic Garden. It includes the BGCI logo and navigation tabs. The main content area displays the garden's name, location (China - Hubei - Wuchang), and contact information. A 'Search Again' and 'Edit Garden' button are visible. A photo of a traditional Chinese pavilion is featured. A 'Related Events' section lists the 'World Botanic Gardens Congress News' and 'Date Set for the 3rd Global Botanic Gardens Congress'. A sidebar on the left contains a 'SIGN UP NOW' button for a free email newsletter.

GardenSearch is an online database of over 2,500 botanic gardens around the world. Hosted and maintained by BGCI, all records are updated and edited by the gardens themselves.

Benefits of GardenSearch:

- Ready access to information on botanic gardens in any country in the world
- An on-line presence for smaller gardens without their own websites
- Geographic and subject-based search function
- Links to news items and scientific articles about the garden
- Direct link to garden's own website

Visit www.bgci.org to explore the world of botanic gardens.
