Find and circle the following words:

- |              |          |
|--------------|----------|
| biodiversity | mountain |
| animals      | variety  |
| plants       | life     |
| people       | climate  |
| earth        | species  |
| forest       | extinct  |
| ocean        | habitat  |
| soil         |          |

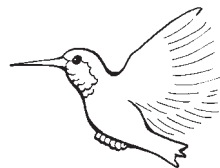

Starting from the top left corner, write down the letters that you **DID NOT** circle in the space below. Read from left to right and from top to bottom. Use **ALL** letters that you have not circled until you have filled in the phrase below.

Answers will be posted on our website [www.bgci.org/canada](http://www.bgci.org/canada).

Biodiversity includes species (different types of animals, plants, fungi, bacteria), ecosystems (different places where species live, like oceans, grasslands, arctic tundra, forests), and genetic differences within species.
