Biodiversity
— the amazing
variety of life on
earth!

Each province and territory in Canada has chosen a special native wildflower as its emblem.

1. Match the flowers to their province by filling in the name of the province in the blanks.
2. Then draw a line from the flower to the province on the map.

Living examples of many of these flowers may be found at your local botanical garden or arboretum. Look for them next time you visit!
