

Quentin Coffey

The ecological reasoning behind my artwork is to show that everything in life leaves a footprint. From the clouds, the sky, rain, water trees and the ground. But just as these natural wonders leave footprints, so do I, you, and us, as human beings. Unfortunately, our human footprints have been damaging and hurting the earth and we need to retrace our steps. We must remember that our marks sear and scar the earth, all the way to the smallest seed. My design illustrates the beauty of nature with mother earth holding a precious seed.
