

Experiencing Nature: Strategies for Engaging the SEN Child

This new one-day course explores some approaches that have been shown to have positive impacts on the progress of children with special educational needs.

LNC09236 | 29 September 2009 | £130 | Science Learning Centre London

Connecting with the natural world can bring social, emotional and cognitive benefits to primary aged special needs learners. On this course you will learn about some approaches that have created positive impacts on children's academic progress.

Through practical activities and discussion you will have the chance to reflect on how you could use such approaches with your pupils.

You will:

- Identify approaches for creating multiple opportunities to engage learners with special needs
- Evaluate science projects that provide dynamic sensory experiences for the SEN child
- Reflect on how you model and provoke language and questioning in your classes
- Be able to recognise and record moments of engagement.

How to book

- E-mail enquiries@london.slcs.ac.uk
- Phone 020 7612 6325
- Fax 020 7612 6792 with your order
- Book online at www.slcs.ac.uk/lnetwork/lnc09236
