## Launching in 2018: A new cross disciplinary Open Access journal

from the

New Phytologist Trust

Plants People Planet

How can plant science solve the global challenges of the 21<sup>st</sup> Century?

*Plants, People, Planet* will seek to answer this question

Plants are at the centre of our everyday lives: without them we would not have the air we breathe, the food we eat, the water we drink, the medicines that keep us well, the clothes we wear, or the fuel to warm our homes.

Our complex relationship with plants has resulted in the world as we know it today, shaping not only the Earth's ecosystems, but also its societies and cultures. As the human race continues to grow the work of plant scientists has never been more important as it seeks to meet the global challenges of the 21<sup>st</sup> Century.

## **Aims and Scope**

Plants, People, Planet aims to publish outstanding research across the plant sciences, placing it firmly within the context of its wider relevance to people, society and the planet. We encourage scientists to consider carefully the impact of their research on the world in which we live. We welcome submissions from all areas of plant sciences, from ecosystem studies to molecular genetics, and we particularly encourage interdisciplinary studies, for instance within the social and medical sciences and chemistry and engineering.

*Plants, People, Planet*, is led by Editor-in-Chief **Simon Hiscock** (University of Oxford, and Director of the Oxford Botanic Garden and Harcourt Arboretum, UK). Simon is supported by **Paul Wilkin**, Head of Science (Natural Capital), at the Royal Botanic Gardens, Kew as Deputy Editor-in-Chief, and an international board of editors.
