Introduction

It is widely recognised that human activities are placing global biodiversity under increasing pressure^{1, 2}. Tropical and temperate forests are amongst the world's most biodiverse ecosystems³, supporting over 50% of all terrestrial species⁴.

Forests also provide a multitude of ecosystem services, including maintenance of vital biogeochemical processes such as nutrient cycling, carbon sequestration, water filtration and localised climate control⁵. Some 350 million people around the world rely on forests for everyday subsistence⁶, and timber, food and medicinal forest species support multimillion dollar industries⁷. However, this wealth of biodiversity and ecosystem services remains at risk from deforestation and forest degradation⁸.

One of the first steps towards safeguarding forest biodiversity is to identify the species most at risk. To address this knowledge gap, Target 2 of the Global Strategy for Plant Conservation (GSPC) calls for "*an assessment of the conservation status of all known plant species*" by 2020⁹. Currently, conservation status assessments meeting the globally-recognised standards of the International Union for the Conservation of Nature (IUCN) Red List of Threatened Species¹⁰ have been carried out at the global level for approximately only 4% of known plant species¹¹. There is therefore an urgent need to conduct such assessments, particularly for 'useful' plants, including tree species valued for timber.

The World Bank estimates that the trade in timber products contributes some \$468 billion annually to global GDP¹². Timber trees also provide numerous critical ecosystem services. However, despite the escalating threats to timber species from land conversion, illegal trade and unsustainable logging, we lack up-to-date conservation status assessments for many of these species.

A compounding problem is the lack of documentation regarding which tree species are actively being harvested for commercial trade. There is currently no unified database of commercially harvested timber tree species, though numerous different lists exist with varying degrees of overlap.

Summary

Purpose

The purpose of this publication is to provide a composite working list of timber tree species in trade, by integrating different species lists from seventeen different sources. Each taxon is listed by scientific binomial or trinomial and family. The sources used to compile the working list are described, together with information on the author / publishing organisation of each source, and where it can be accessed. This information is intended to be of use to taxonomists; botanical, conservation and ecological researchers; timber-sourcing organisations; woodworkers; and other interested parties.

It should be noted that this list does not constitute a definitive statement regarding which tree species are traded for timber. This reflects the fact that information relating to the use of timber tree species is poorly documented and highly fragmentary. As many different lists of such species have been produced, the purpose of this publication is to provide a readily accessible summary of this information, to help identify those species for which a strong consensus exists regarding their use for timber, and those for which information is lacking. This working list is provided to encourage further research and assessment, to determine with greater precision the use of different tree species for timber.

Aims

- Provide an integrated list of open access (or easily accessible) sources supplying information on commercial timber tree species.
- Provide an overview of which tree species are currently harvested and traded commercially on the international timber market.

Considerations for using the Working List

1. Choosing source lists to compile

There are numerous existing timber species lists, from published IUCN Red List assessments to national trade inventories. However, these lists were created for a variety of different purposes, with different degrees of reliability and a varying degree of overlap. It was decided to base the following working list on a thorough review of contemporary open-access resources, including regularly-updated web databases, which list commercial timbers. The decision to omit the IUCN Red List database from these consolidated source lists is explained in greater detail in Section 1.

2. How well does the working list reflect current trade?

Although the global timber trade is of current and historic importance, it is poorly documented and, consequently, information on which tree species are harvested is sparse and often difficult to access. With this in mind, it was decided that a list incorporating data from a diverse range of recent trade-related resources would provide a useful indication of current species in international trade. This approach enables species to be identified for which a high degree of consensus exists regarding their use as timber. However, the list unavoidably incorporates a high degree of uncertainty, and this should be borne in mind when interpreting the results.

This working list is intended to give a current overview of commercial timbers on the international market. However, trade in any species waxes and wanes with customer demand and species availability. Therefore, it should be acknowledged that any list will require future updates to reflect changes in the trade. The following working list should therefore be considered as a work in progress rather than a definitive statement.

3. Nomenclature

The names that woods are traded under do not always follow conventional scientific notation. Rather, it is common practice to trade a species under a product type (e.g. ‘sawn logs’), or by a common name, which may differ between countries and regions. Trade lists of timber trees described by full Latin binomial are therefore in the minority. This presents a problem when identifying timber species, so to maximise reliability, this working list is compiled from only those sources that use the full Latin binomial or trinomial.

4. Product types

Timber can be broadly divided into two product groups: a) timber valued for construction qualities such as strength, flexibility or durability; b) timber valued for aesthetic qualities such as colour, patterning or acoustic properties (e.g. in woods used to make musical instruments). Additionally, a timber may be favoured for traditional reasons, for example because its use historically signified wealth or prestige. Some of the species in the working list may have other major commercial uses, for example as fruit trees. These species may be secondarily used for timber products, such as veneers.

5. Illegally traded species

Despite advances in certification and tracking of wood products from place of harvest to end product, there is still a flourishing illegal trade in timber species. The sources used for this working list do not explicitly focus on illegally traded species, with the exception of species listed on Appendix III of the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)¹³. However, consumer demand for timbers with certain desirable aesthetic and construction qualities fuels both illegal and legal trade. Therefore, it seems likely that illegally logged taxa will be represented in the working list.

6. Updates

As a working list, this species list is intended to evolve and to be refined by users. We welcome relevant information on the timber species listed, or on any commercial timber species that have been unintentionally omitted.

Section Guide

Section 1 explains the methods and rationale behind this publication.

Section 2 provides a description of each of the resources used.

Section 3 is a working list of commercial timber species, compiled from seventeen open-access resources published by conservation organisations, commercial companies, and taxonomic and woodwork databases.

Section 1: Methods and Rationale

Rationale - Which tree species are internationally traded for timber?

Our original intention was to base this list on the list of timber species previously assessed for the IUCN Red List, primarily those included in *The World List of Threatened Trees* (Oldfield *et al.*, 1998)¹⁴. However, after consultation with TRAFFIC¹⁵ and the IUCN¹⁶, it became apparent that these previous assessments may not accurately reflect species currently in trade. It was concluded that a more representative list might be compiled using more recent data, including CITES-listed timber tree species; trade reports; and publications from conservation organisations. The current integrated list is based on such sources.

We have also included independently run databases such as woodexplorer.com and thewooddatabase.com, used by taxonomists and woodworkers interested in identifying commercial timber products to species level. Some of these resources are regularly updated and may benefit from crowd-sourcing user's comments to rapidly detect and correct errors.

In addition to the well-known timber trade authorities CITES, TRAFFIC, the International Tropical Timber Organisation (ITTO) and L'Association Technique Internationale des Bois Tropicaux (ATIBT), it was decided to include species lists from organisations with a focus on legal sourcing of timber, including Nature Ecology and People Consult (NEPCon), the Forest Stewardship Council (FSC), Greenpeace and the World Wide Fund for Nature (WWF). The former two organisations work directly with private sector sourcing companies, therefore should be indicative of what is actually in trade.

Methods

1. List compilation

Taxa lists were extracted from seventeen open-access sources (see Section 2 for a description of each source) and combined into a single list using Microsoft Excel¹⁷.

2. Data cleaning and taxonomic checks

First, the composite list was cleaned to remove duplicates, genus-only listings and common/trade names. Next, *The Plant List*¹⁸ was used as a taxonomic reference to check for synonymy and spelling errors.

3. Ranking

To check reliability, we attempted to trace the initial origin of each species list used. In some cases it was impossible to determine exact origins. Therefore, each species was ranked by the number of sources in which it was featured (for full ranked list, see Appendix II – Microsoft Excel spreadsheet). Taxa appearing in only one resource were excluded from the final published working list. By listing only those taxa appearing in two or more resources, we minimised the chance of erroneously including non-timbers.

4. Removing gymnosperms

Gymnosperm taxa were removed from the compiled list using *The Gymnosperm Database*¹⁹ as a taxonomic reference. They are presented in Appendix I.

Section 2: Resources List

The following seventeen resources were produced by international development, conservation and forest certification organisations; consultants on the timber trade; national forestry departments; taxonomists; and woodworkers.

Table 1 - Resources used to compile working list of commercial timbers

Resource name	Organisation / Author	Date published / version used	Will resource be updated in future?
CITES Appendices I, II, III	Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES)	2013	Yes - CITES member states convene every 3 years at a Conference of the Parties (CoP). Amendments to Appendices I & II must be made at a CoP. Species may be added or removed from Appendix III at any time.
Resource description	The CITES Appendices are lists of species of fauna and flora, including some timber tree species, that are or may soon become threatened with extinction. CITES affords these species different levels of protection from over-exploitation by regulating their commercial trade.		
Available from	http://www.cites.org/eng/app/applications.php		

Good Wood Guide	Greenpeace	2004	Not updated
Resource description	Consumer guide listing traditionally-harvested timbers together with more sustainable, FSC certified alternatives. Provides information on IUCN Red List status of the 'traditional' species.		
Available from	http://www.greenpeace.org.uk/MultimediaFiles/Live/FullReport/6759.pdf		

FSC Species Terminology	Forest Stewardship Council (FSC)	2007	Not updated
Resource description	A compilation of tree species commonly used in international trade, giving both scientific and common names, as well as synonyms. Updates discontinued. For more information, please contact FSC.		
Available from	FSC_STD_40_004b_V1_0_EN_FSC_Species_Terminology.pdf		

Good Wood Guide Checklist	Friends of the Earth; Fauna and Flora International	Unknown	Not updated
Resource description	Consumer guide to sustainably-sourced wood for construction (or similar) projects. Lists timber species by common and scientific name, and provides information on uses, geographic origin and global threat status (according to the IUCN Red List and CITES).		
Available from	http://www.foe.co.uk/campaigns/biodiversity/resource/good_wood_guide/wood_timber_types_a_to_g.html		

Resource name	Organisation / Author	Date / Version	Will resource be updated in future?
An assessment of tree species which warrant listing in CITES	Hewitt, J	2007	Not updated
Resource description	Report prepared for Milieudefensie (Friends of the Earth, Netherlands), giving case studies of 17 commercial timber species considered to warrant CITES listing due to perceived threat from unsustainable or illegal trade. Also provides information on 4 CITES-listed species.		
Available from	https://milieudefensie.nl/publicaties/rapporten/an-assessment-of-tree-species-which-warrant-listing-in-cites		

Annual review and assessment of the world timber situation - Appendix 3: Major tropical species traded in 2010 and 2011	International Tropical Timber Organization (ITTO)	2012	Yes – this publication is now produced biannually (since 2013).
Resource description	ITTO Annual Reviews provide statistics on global production and trade in timber, with main focus on tropical regions. They utilise data submitted by ITTO member countries. Appendix 3 of the 2012 report gives common and scientific names of the major tropical timber species in trade (2010-2011).		
Available from	http://www.itto.int/annual_review/		

Nomenclature générale des bois tropicaux (p.2-40)	L'Association Technique Internationale des Bois Tropicaux (ATIBT)	2013	Future updates possible
Resource description	Internationally-recognised nomenclature linking common name to correct scientific name for commercially traded tropical timber species. Common name given is that under which each species is traded by the main country of export or import. An English language version of this document is available on request from ATIBT.		
Available from	http://www.atibt.org/wp-content/uploads/2013/06/Nomenclature-ATIBT-26062013.pdf		

NEPCon LegalSource™ Due Diligence System	NEPCon	2013	Not updated
Resource description	NEPCon's LegalSource™ Due Diligence System provides resources for client organisations wanting to ensure legal timber sourcing. Online guidance material includes an example list of timber species in trade. Registration is required to access this resource.		
Available from	http://www.nepcon.net/5174/English/Certification/Timber_legality_services/Due_diligence_system/		

Resource name	Organisation / Author	Date / Version	Will resource be updated in future?
Commercial timbers: descriptions, illustrations, identification and information retrieval	Richter, H.G. and Dallwitz, M.J.	Dates from 2000. Version: 25 th June 2009	Future updates possible
Resource description	Database of common hardwood timber species in international trade. Provides taxa descriptions and an interactive identification system for 350+ commercial timbers.		
Available from	http://delta-intkey.com		

Wood Species Database	The Timber Research and Development Association (TRADA)	Version: 2002-2014	Future updates likely
Resource description	A searchable, illustrated database of 150+ commercial timber species, including information on mechanical properties and common end uses of each wood. Registration (free) is required to access this resource.		
Available from	http://www.trada.co.uk/techinfo/tsg		

The Wood Database	Meier, E	Version: 2014	Yes – resource continues to be updated
Resource description	Comprehensive database for woodworkers, searchable by scientific name, common name or wood appearance. Species-specific information on general distribution, average tree size, appearance and mechanical properties of wood. A regularly updated resource.		
Available from	http://www.wood-database.com/wood-identification/by-scientific-name/		

Timber species imported into the UK	Timber Trade Federation (TTF)	2009	Not updated
Resource description	Guide to UK timber species imports, divided into three categories: natural forest hardwoods, natural forest softwoods and plantation species. The guide also details which of these taxa are CITES-listed. Non-TTF members will need to request access to this resource.		
Available from	http://www.ttf.co.uk/Article/Detail.aspx?ArticleUid=ee39cec8-21b6-4be4-9361-6001612c7190		

Resource name	Organisation / Author	Date / Version	Will resource be updated in future?
Precious woods: Exploitation of the finest timber (p.36-45)	TRAFFIC	2012	Not updated
Resource description	Report on high value timbers, commissioned by Chatham House as a background paper for their meeting: ' <i>Tackling the Trade in Illegal Precious Woods</i> ' on 23-24 April 2012.		
Available from	http://www.illegal-logging.info/sites/default/files/uploads/PreciousWoodsbackgroundpaper1ThetradeinpreciouswoodsTRAFFIC.pdf		

Wood Properties Techsheets	United States Department of Agriculture Forest Products Laboratory	Publication date unknown	Unlikely to be updated
Resource description	Four 'Techsheets': Lesser known woods; North American hardwoods; North American softwoods; tropical hardwoods. Provide information on distribution, commercial use, wood mechanical properties and appearance of selected timber taxa.		
Available from	http://www.fpl.fs.fed.us/research/centers/woodanatomy/		

The Wood Explorer	The Wood Explorer, Inc.	Version: 2014	Yes – resource continues to be updated
Resource description	Free access to a searchable list of 1650 commercial species, including scientific, trade and common names. Species pages include common end uses and a description of both tree and wood properties. Additional data available for a fee.		
Available from	http://www.thewoodexplorer.com/species.html		

Woodworkers Source Wood Library	Woodworkers Source	2008	Future updates likely
Resource description	Database of commercial timber species, listed by scientific and common name. Species-specific information on timber end uses, geographic region, wood working properties, and appearance of tree and wood.		
Available from	http://www.woodworkerssource.com/wood_library.php		

Guide to lesser-known tropical timber species (p.4-86)	World Wildlife Fund (WWF) Global Forest & Trade Network	2013	Not updated
Resource description	Consumer guide to lesser-known species as alternatives for traditionally-sourced timbers. Provides information on IUCN Red List status of the traditional species, and possible end uses of the lesser-known species profiled.		
Available from	wwf_gftn_lkts_guide_final_oct_2013.pdf		

Section 3: Timber tree species working list

The following is a working list of 1,575 timber taxa, listed alphabetically by family. A full breakdown of the number of resources in which each taxon was listed, as well as resource identity (see Table 1 above for a description of each resource used) is provided in Appendix II.

Family:	Scientific name:
<i>Achariaceae</i>	<i>Scottellia coriacea</i> <i>Scottellia kamerunensis</i>
<i>Altingiaceae</i>	<i>Altingia excelsa</i> <i>Liquidambar formosana</i> <i>Liquidambar styraciflua</i>
<i>Anacardiaceae</i>	<i>Anacardium excelsum</i> <i>Anacardium giganteum</i> <i>Anacardium occidentale</i> <i>Anacardium spruceanum</i> <i>Antrocaryon klaineanum</i> <i>Antrocaryon micraster</i> <i>Astronium fraxinifolium</i> <i>Astronium graveolens</i> <i>Astronium lecointei</i> <i>Astronium urundeuva</i> <i>Buchanania arborescens</i> <i>Buchanania latifolia</i> <i>Campnosperma auriculatum</i> <i>Campnosperma brevipetiolatum</i> <i>Campnosperma coriaceum</i> <i>Campnosperma montanum</i> <i>Campnosperma panamense</i> <i>Campnosperma squamatum</i> <i>Dracontomelon costatum</i> <i>Dracontomelon dao</i> <i>Dracontomelon lenticulatum</i> <i>Euroschinus vieillardii</i> <i>Gluta curtisii</i> <i>Gluta papuana</i> <i>Gluta rengas</i> <i>Gluta tourtour</i> <i>Gluta wallichii</i> <i>Koordersiodendron pinnatum</i> <i>Lannea coromandelica</i> <i>Lannea welwitschii</i>

	<i>Loxopterygium sagotii</i> <i>Mangifera altissima</i> <i>Mangifera caloneura</i> <i>Mangifera foetida</i> <i>Mangifera indica</i> <i>Mangifera mucronulata</i> <i>Mangifera salomonensis</i> <i>Metopium brownei</i> <i>Parishia insignis</i> <i>Rhus typhina</i> <i>Schinopsis balansae</i> <i>Schinopsis lorentzii</i> <i>Schinopsis quebracho-colorado</i> <i>Schinus molle</i> <i>Spondias mombin</i> <i>Swintonia floribunda</i> <i>Swintonia schwenckii</i> <i>Swintonia spicifera</i> <i>Tapirira guianensis</i>
Anisophylleaceae	<i>Combretocarpus rotundatus</i> <i>Poga oleosa</i>
Annonaceae	<i>Annickia chlorantha</i> <i>Anonidium manni</i> <i>Cananga odorata</i> <i>Cleistopholis glauca</i> <i>Cleistopholis patens</i> <i>Duguetia confinis</i> <i>Duguetia staudtii</i> <i>Mezzettia parviflora</i> <i>Oxandra lanceolata</i> <i>Polyalthia fragrans</i> <i>Polyalthia oblongifolia</i>
Apocynaceae	<i>Alstonia actinophylla</i> <i>Alstonia angustifolia</i> <i>Alstonia angustiloba</i> <i>Alstonia boonei</i> <i>Alstonia congensis</i> <i>Alstonia macrophylla</i> <i>Alstonia scholaris</i> <i>Alstonia spatulata</i> <i>Aspidosperma album</i> <i>Aspidosperma desmanthum</i> <i>Aspidosperma megalocarpon</i> <i>Aspidosperma polyneuron</i>

	<i>Aspidosperma quebracho-blanco</i> <i>Aspidosperma tomentosum</i> <i>Aspidosperma vargasii</i> <i>Cerbera odollam</i> <i>Couma macrocarpa</i> <i>Dyera costulata</i> <i>Dyera polyphylla</i> <i>Funtumia africana</i> <i>Gonioma kamassi</i> <i>Wrightia arborea</i> <i>Wrightia pubescens</i>
Aquifoliaceae	<i>Ilex aggregata</i> <i>Ilex amplifolia</i> <i>Ilex anomala</i> <i>Ilex aquifolium</i> <i>Ilex boliviensis</i> <i>Ilex laurina</i> <i>Ilex mitis</i> <i>Ilex opaca</i> <i>Ilex petiolaris</i>
Araliaceae	<i>Dendropanax arboreus</i> <i>Dendropanax cuneatus</i> <i>Kalopanax septemlobus</i> <i>Polyscias ornifolia</i> <i>Schefflera deciphylla</i> <i>Schefflera morototoni</i>
Arecaceae	<i>Beccariophoenix madagascariensis</i> <i>Borassus flabellifer</i> <i>Caryota urens</i> <i>Cocos nucifera</i> <i>Dypsis decaryi</i> <i>Dypsis decipiens</i> <i>Lemurophoenix halleuxii</i> <i>Marojejya darianii</i> <i>Oenocarpus bataua</i> <i>Ravenea louvelii</i> <i>Ravenea rivularis</i> <i>Satranala decussilvae</i>
Asteropeiaceae	<i>Asteropeia rhopaloides</i>
Atherospermataceae	<i>Atherosperma moschatum</i> <i>Doryphora sassafras</i> <i>Laurelia novae-zelandiae</i>

	<i>Laurelia sempervirens</i> <i>Laureliopsis philippiana</i>
Berberidaceae	<i>Sinopodophyllum hexandrum</i>
Betulaceae	<i>Alnus glutinosa</i> <i>Alnus incana</i> <i>Alnus nepalensis</i> <i>Alnus rubra</i> <i>Betula alleghaniensis</i> <i>Betula alnoides</i> <i>Betula lenta</i> <i>Betula maximowicziana</i> <i>Betula nigra</i> <i>Betula papyrifera</i> <i>Betula pendula</i> <i>Betula populifolia</i> <i>Betula pubescens</i> <i>Betula schmidtii</i> <i>Carpinus betulus</i> <i>Carpinus caroliniana</i> <i>Corylus avellana</i> <i>Corylus colurna</i> <i>Ostrya virginiana</i>
Bignoniaceae	<i>Catalpa bignonioides</i> <i>Catalpa speciosa</i> <i>Daniella thurifera</i> <i>Daniellia klainei</i> <i>Handroanthus capitatus</i> <i>Handroanthus guayacan</i> <i>Handroanthus heptaphyllus</i> <i>Handroanthus serratifolius</i> <i>Jacaranda acutifolia</i> <i>Jacaranda caroba</i> <i>Jacaranda copaia</i> <i>Jacaranda cuspidifolia</i> <i>Jacaranda micrantha</i> <i>Jacaranda mimosifolia</i> <i>Jacaranda obtusifolia</i> subsp. <i>rhombifolia</i> <i>Jacaranda obtusifolia</i> <i>Jacaranda puberula</i> <i>Kigelia africana</i> <i>Paratecoma peroba</i> <i>Phyllarthron madagascariense</i> <i>Roseodendron donnell-smithii</i> <i>Spathodea campanulata</i>

	<i>Tabebuia insignis</i> <i>Tabebuia pallida</i> <i>Tabebuia rosea</i>
Bixaceae	<i>Bixa arborea</i> <i>Bixa orellana</i>
Boraginaceae	<i>Cordia africana</i> <i>Cordia alliodora</i> <i>Cordia americana</i> <i>Cordia collococca</i> <i>Cordia dichotoma</i> <i>Cordia dodecandra</i> <i>Cordia elaeagnoides</i> <i>Cordia fragrantissima</i> <i>Cordia gerascanthus</i> <i>Cordia glabrata</i> <i>Cordia goeldiana</i> <i>Cordia millenii</i> <i>Cordia platythyrsa</i> <i>Cordia sebestena</i> <i>Cordia subcordata</i> <i>Cordia trichotoma</i>
Burseraceae	<i>Aucoumea klaineana</i> <i>Bursera simaruba</i> <i>Canarium euphyllum</i> <i>Canarium hirsutum</i> <i>Canarium indicum</i> <i>Canarium littorale</i> <i>Canarium luzonicum</i> <i>Canarium schweinfurtii</i> <i>Dacryodes buettneri</i> <i>Dacryodes excelsa</i> <i>Dacryodes igaganga</i> <i>Garuga pinnata</i> <i>Protium altsonii</i> <i>Protium decandrum</i> <i>Protium sagotianum</i> <i>Santiria laevigata</i> <i>Tetragastris altissima</i> <i>Tetragastris panamensis</i>
Buxaceae	<i>Buxus macowanii</i> <i>Buxus sempervirens</i>
Calophyllaceae	<i>Mammea africana</i>

	<i>Mammea americana</i> <i>Mesua ferrea</i>
<i>Canellaceae</i>	<i>Warburgia ugandensis</i>
<i>Cannabaceae</i>	<i>Aphananthe philippinensis</i> <i>Celtis adolfi-friderici</i> <i>Celtis laevigata</i> <i>Celtis laevigata</i> var. <i>reticulata</i> <i>Celtis mildbraedii</i> <i>Celtis occidentalis</i> <i>Celtis philippensis</i> <i>Celtis rigescens</i> <i>Celtis zenkeri</i> <i>Trema orientalis</i>
<i>Caryocaraceae</i>	<i>Caryocar costaricense</i> <i>Caryocar glabrum</i> <i>Caryocar nuciferum</i> <i>Caryocar villosum</i>
<i>Casuarinaceae</i>	<i>Casuarina cunninghamiana</i> <i>Casuarina equisetifolia</i>
<i>Celastraceae</i>	<i>Kokoona littoralis</i> <i>Kokoona reflexa</i> <i>Lophopetalum beccarianum</i> <i>Lophopetalum duperreanum</i> <i>Lophopetalum floribundum</i> <i>Lophopetalum javanum</i> <i>Lophopetalum multinervium</i> <i>Lophopetalum pachyphyllum</i> <i>Lophopetalum pallidum</i> <i>Lophopetalum rigidum</i> <i>Lophopetalum subobovatum</i> <i>Lophopetalum wightianum</i> <i>Siphonodon australis</i>
<i>Cercidiphyllaceae</i>	<i>Cercidiphyllum japonicum</i>
<i>Chrysobalanaceae</i>	<i>Licania divaricata</i> <i>Licania heteromorpha</i> <i>Licania hypoleuca</i> <i>Licania macrophylla</i> <i>Licania platypus</i> <i>Licania sparsipilis</i> <i>Licaria capitata</i>

	<i>Parinari campestris</i> <i>Parinari curatellifolia</i> <i>Parinari excelsa</i>
Clusiaceae	<i>Calophyllum brasiliense</i> <i>Calophyllum ferrugineum</i> <i>Calophyllum inophyllum</i> <i>Calophyllum papuanum</i> <i>Calophyllum peekelii</i> <i>Calophyllum tetrapterum</i> <i>Calophyllum tomentosum</i> <i>Calophyllum vitiense</i> <i>Garcinia cowa</i> <i>Pentadesma butyracea</i> <i>Platonia insignis</i> <i>Sympmania globulifera</i>
Combretaceae	<i>Anogeissus acuminata</i> <i>Anogeissus latifolia</i> <i>Buchenavia tetraphylla</i> <i>Bucida buceras</i> <i>Combretum imberbe</i> <i>Conocarpus erectus</i> <i>Pteleopsis hylodendron</i> <i>Pteleopsis myrtifolia</i> <i>Terminalia alata</i> <i>Terminalia amazonia</i> <i>Terminalia arjuna</i> <i>Terminalia bellirica</i> <i>Terminalia bialata</i> <i>Terminalia brassii</i> <i>Terminalia calamansanay</i> <i>Terminalia catappa</i> <i>Terminalia celebica</i> <i>Terminalia chebula</i> <i>Terminalia complanata</i> <i>Terminalia guyanensis</i> <i>Terminalia ivorensis</i> <i>Terminalia macroptera</i> <i>Terminalia microcarpa</i> <i>Terminalia nitens</i> <i>Terminalia oblonga</i> <i>Terminalia paniculata</i> <i>Terminalia procera</i> <i>Terminalia solomonensis</i> <i>Terminalia superba</i> <i>Terminalia tomentosa</i>

Compositae	<i>Brachylaena huillensis</i> <i>Brachylaena merana</i> <i>Brachylaena ramiflora</i>
Convolvulaceae	<i>Humbertia madagascariensis</i>
Cornaceae	<i>Alangium meyeri</i> <i>Cornus florida</i> <i>Nyssa aquatica</i> <i>Nyssa ogeche</i> <i>Nyssa sylvatica</i>
Ctenolophonaceae	<i>Ctenolophon englerianus</i> <i>Ctenolophon parvifolius</i>
Cunoniaceae	<i>Ceratopetalum succirubrum</i> <i>Eucryphia cordifolia</i> <i>Eucryphia lucida</i> <i>Geissois benthamiana</i> <i>Geissois biagiana</i> <i>Weinmannia trichosperma</i>
Dilleniaceae	<i>Dillenia excelsa</i> <i>Dillenia indica</i> <i>Dillenia luzoniensis</i> <i>Dillenia ovata</i> <i>Dillenia papuana</i> <i>Dillenia pentagyna</i> <i>Dillenia philippinensis</i> <i>Dillenia pulchella</i> <i>Dillenia reticulata</i> <i>Dillenia salomonensis</i> <i>Dillenia schlechteri</i>
Dipterocarpaceae	<i>Anisoptera costata</i> <i>Anisoptera curtisii</i> <i>Anisoptera laevis</i> <i>Anisoptera marginata</i> <i>Anisoptera scaphula</i> <i>Anisoptera thurifera</i> <i>Balanocarpus heimii</i> <i>Cotylelobium burckii</i> <i>Cotylelobium lanceolatum</i> <i>Cotylelobium melanoxyylon</i> <i>Dipterocarpus acutangulus</i> <i>Dipterocarpus alatus</i>

Dipterocarpus basilanicus
Dipterocarpus baudii
Dipterocarpus borneensis
Dipterocarpus caudiferus
Dipterocarpus costulatus
Dipterocarpus grandiflorus
Dipterocarpus kerrii
Dipterocarpus lowii
Dipterocarpus retusus
Dipterocarpus validus
Dipterocarpus verrucosus
Dryobalanops beccarii
Dryobalanops lanceolata
Dryobalanops oblongifolia
Dryobalanops sumatrensis
Hopea acuminata

Appendix I: List of gymnosperms traded for timber

The following is a list of gymnosperm tree taxa that were featured in two or more of the source lists described in Section 2 above. Gymnosperms were separated from the rest of the Working List tree taxa using *The Gymnosperm Database* and *The Plant List* for taxonomic reference.

Family:	Scientific name:	Number of sources:
<i>Araucariaceae</i>	<i>Agathis alba</i>	2
	<i>Agathis australis</i>	2
	<i>Agathis borneensis</i>	2
	<i>Agathis dammara</i>	2
	<i>Agathis macrophylla</i>	5
	<i>Agathis moorei</i>	2
	<i>Agathis philippinensis</i>	2
	<i>Agathis robusta</i>	3
	<i>Araucaria angustifolia</i>	9
	<i>Araucaria araucana</i>	5
	<i>Araucaria bidwillii</i>	2
	<i>Araucaria columnaris</i>	4
	<i>Araucaria cunninghamii</i>	3
	<i>Araucaria hunsteinii</i>	5
<i>Cupressaceae</i>	<i>Callitris columellaris</i>	11
	<i>Callitris endlicheri</i>	2
	<i>Calocedrus decurrens</i>	5
	<i>Chamaecyparis lawsoniana</i>	4
	<i>Chamaecyparis thyoides</i>	4
	<i>Cryptomeria japonica</i>	3
	<i>Cunninghamia lanceolata</i>	2
	<i>Cupressus lusitanica</i>	5
	<i>Cupressus macnabiana</i>	2
	<i>Cupressus macrocarpa</i>	3
	<i>Cupressus nootkatensis</i>	4
	<i>Cupressus sempervirens</i>	4
	<i>Cupressus torulosa</i>	2
	<i>Fitzroya cupressoides</i>	5
	<i>Juniperus deppeana</i>	3
	<i>Juniperus occidentalis</i>	2
	<i>Juniperus oxycedrus</i>	2
	<i>Juniperus procera</i>	6
	<i>Juniperus virginiana</i>	7
	<i>Pilgerodendron uviferum</i>	2

	<i>Platycladus orientalis</i>	2
	<i>Sequoia sempervirens</i>	5
	<i>Sequoiadendron gigantium</i>	2
	<i>Taxodium distichum</i>	5
	<i>Tetraclinis articulata</i>	3
	<i>Thuja occidentalis</i>	4
	<i>Thuja plicata</i>	8
	<i>Widdringtonia whytei</i>	4
<i>Pinaceae</i>	<i>Abies alba</i>	7
	<i>Abies amabilis</i>	4
	<i>Abies balsamea</i>	4
	<i>Abies bracteata</i>	2
	<i>Abies concolor</i>	4
	<i>Abies grandis</i>	5
	<i>Abies guatemalensis</i>	3
	<i>Abies lasiocarpa</i>	6
	<i>Abies magnifica</i>	4
	<i>Abies procera</i>	4
	<i>Abies sibirica</i>	2
	<i>Abies spectabilis</i>	2
	<i>Cedrus atlantica</i>	2
	<i>Cedrus deodara</i>	2
	<i>Cedrus libani</i>	5
	<i>Larix decidua</i>	9
	<i>Larix gmelinii</i>	3
	<i>Larix kaempferi</i>	5
	<i>Larix laricina</i>	8
	<i>Larix occidentalis</i>	4
	<i>Larix sibirica</i>	3
	<i>Picea abies</i>	8
	<i>Picea engelmannii</i>	6
	<i>Picea glauca</i>	5
	<i>Picea jezoensis</i>	3
	<i>Picea mariana</i>	6
	<i>Picea omorika</i>	2
	<i>Picea rubens</i>	5
	<i>Picea sitchensis</i>	7
	<i>Pinus ayacahuite</i>	2
	<i>Pinus banksiana</i>	5
	<i>Pinus caribaea</i>	7
	<i>Pinus clausa</i>	4
	<i>Pinus contorta</i>	6
	<i>Pinus devoniana</i>	2
	<i>Pinus echinata</i>	5
	<i>Pinus edulis</i>	3
	<i>Pinus elliottii</i>	8

	<i>Pinus engelmannii</i>	2
	<i>Pinus flexilis</i>	3
	<i>Pinus glabra</i>	4
	<i>Pinus heldreichii</i>	2
	<i>Pinus jeffreyi</i>	3
	<i>Pinus kesiya</i>	5
	<i>Pinus kesiya</i> var. <i>langbianensis</i>	3
	<i>Pinus koraiensis</i>	4
	<i>Pinus lambertiana</i>	3
	<i>Pinus merkusii</i>	4
	<i>Pinus montezumae</i>	3
	<i>Pinus monticola</i>	3
	<i>Pinus mugo</i>	2
	<i>Pinus nigra</i>	2
	<i>Pinus oocarpa</i>	3
	<i>Pinus palustris</i>	6
	<i>Pinus patula</i>	2
	<i>Pinus pinaster</i>	3
	<i>Pinus ponderosa</i>	4
	<i>Pinus pringlei</i>	2
	<i>Pinus pseudostrobus</i>	2
	<i>Pinus pungens</i>	2
	<i>Pinus radiata</i>	5
	<i>Pinus resinosa</i>	5
	<i>Pinus rigida</i>	3
	<i>Pinus serotina</i>	3
	<i>Pinus strobus</i>	5
	<i>Pinus sylvestris</i>	5
	<i>Pinus taeda</i>	4
	<i>Pinus taiwanensis</i>	2
	<i>Pinus virginiana</i>	4
	<i>Pinus wallichiana</i>	2
	<i>Pseudotsuga menziesii</i>	12
	<i>Tsuga canadensis</i>	3
	<i>Tsuga heterophylla</i>	9
	<i>Tsuga mertensiana</i>	2
 Podocarpaceae		
	<i>Afrocarpus falcatus</i>	2
	<i>Afrocarpus gracilior</i>	2
	<i>Dacrycarpus dacrydioides</i>	2
	<i>Dacrycarpus imbricatus</i>	4
	<i>Dacrydium beccarii</i>	2
	<i>Dacrydium cupressinum</i>	4
	<i>Dacrydium elatum</i>	2
	<i>Dacrydium nidulum</i>	3
	<i>Lagarostrobos franklinii</i>	2
	<i>Nageia wallichiana</i>	2

	<i>Phyllocladus aspleniifolius</i>	3
	<i>Podocarpus guatemalensis</i>	2
	<i>Podocarpus neriiifolius</i>	4
	<i>Podocarpus rumphii</i>	2
	<i>Prumnopitys ferruginea</i>	2
Taxaceae		
	<i>Taxus baccata</i>	6
	<i>Taxus brevifolia</i>	4
	<i>Taxus cuspidata</i>	2
	<i>Taxus fuana</i>	2
	<i>Taxus sumatrana</i>	2
	<i>Taxus wallichiana</i>	2
	<i>Taxus wallichiana</i> var. <i>chinensis</i>	2

Appendix II: Breakdown of taxa by source list

Appendix II is provided to explain the origins of the Working List. For the full ranked working list of (non-gymnosperm) timber taxa, please refer to the attached Microsoft Excel spreadsheet. Each of the seventeen resources, or source lists, (described in Table 1 of this document) has been assigned a letter A-Q. Taxa are listed by scientific name along the spreadsheet's vertical axis, with the resource letters (A-Q) as the column headers. Each 'y' symbol alongside a scientific name indicates that this name was found in the resource at the top of the column in question.

Key to source lists:

- A - Commercial timbers: descriptions, illustrations, identification and information retrieval (Delta-Intkey)
- B - Nomenclature générale des bois tropicaux (ATIBT)
- C - Wood Species Database (TRADA)
- D - Woodworkers Source Wood Library
- E - Annual review and assessment of the world timber situation - Appendix 3: Major tropical species traded in 2010 and 2011 (ITTO)
- F - Good Wood Guide (Greenpeace)
- G - Good Wood Guide Checklist (Friends of the Earth; Fauna and Flora International)
- H - FSC Species Terminology (Forest Stewardship Council)
- I - Wood Properties Techsheets (US Department of Agriculture)
- J - The Wood Database (Meier, E)
- K - Guide to lesser-known tropical timber species (World Wildlife Fund)
- L - Timber species imported into the UK, 2009 (Timber Trade Federation, UK)
- M - Report: Precious woods: Exploitation of the finest timber (TRAFFIC)
- N - Report: An assessment of tree species which warrant listing in CITES (Hewitt, J)
- O - CITES Appendices I, II, III
- P - The Wood Explorer, Inc.
- Q - NEPCon LegalSource™ Due Diligence System
