# AZE Tree Species: Colombia

The three principles of Alliance for Zero Extinction (AZE) sites are Endangerment, Irreplaceability & Discreetness.

- 135 Colombian tree species trigger Alliance for Zero Extinction (AZE) sites
- Representing 4.6% globally identified AZE tree species
- 37% Critically Endangered and Endangered Colombian trees are AZE tree species

- 58% Colombian AZE tree species only occur outside Key Biodiversity Areas (KBA) or Protected Areas (PA)
- 41% Colombian AZE tree species occur inside a KBA or PA
- 18 Colombian AZE tree species occur completely within existing KBA

The potential AZE species were identified through the BGCI AZE project, based on IUCN Red List 2022-2 data. Find out more about AZE's at: [www.zeroextinction.org](http://www.zeroextinction.org). [Find out more on BGCI's AZE project page.](#)
