AZE Tree Species: Mexico

The three principles of Alliance for Zero Extinction (AZE) sites are Endangerment, Irreplaceability & Discreetness.

- 169 Mexican tree species trigger Alliance for Zero Extinction (AZE) sites
- Representing 5.8% globally identified AZE tree species
- 27% Critically Endangered and Endangered Mexican trees are AZE tree species

- 7% Mexican AZE tree species only occur outside Key Biodiversity Areas (KBA) or Protected Areas (PA)
- 33% Mexican AZE tree species occur inside a KBA or PA
- 38 Mexican AZE tree species occur completely within existing KBA

The potential AZE species were identified through the BGCI AZE project, based on IUCN Red List 2022-2 data. Find out more about AZEs at: www.zeroextinction.org. *Find out more on BGCI's AZE project page.*
